A 3-Day Advanced Workshop for Practitioners and Managers

Advanced Internet Intelligence & Online Investigation Course

Brought to you by:

Focused on the GCC region and delivered by Toddington International Inc. in conjunction with TRENDS Professional & Management Development Training, this advanced 3-day training program will provide attendees with cutting-edge skills to properly collect, analyze and disseminate actionable intelligence and facilitate better decision making across the entire breadth of their organizations.

Course Overview

In today's information-based economy, online research and analysis skills are essential requirements at every level of every organisation - acquiring useful and relevant Open Source Intelligence (OSINT) requires much more than just an ability to surf the Web. | Aimed at managers, frontline investigators, researchers, and intelligence analysts alike, this advanced three-day programme will provide detailed instruction on effectively using the Internet as an Open Source Intelligence, research, and investigation tool.

Demonstrating advanced search and analysis techniques for mining Web-based and social media information, this comprehensive training programme will also examine a number of case studies that will focus on highlighting and correcting potential pitfalls that can compromise Investigative or intelligence gathering efforts.

Who Should Attend:

Law Enforcements, Government Entities & Officers * Security and Intelligence Researchers & Professionals * Finance Crime compliance & Analysis Managers and personnel * Information Specialists * Human Resource Managers * Recruiters and Background Check Professionals * Auditors & Analysts

TRENDS Training

TRENDS Training is one of the institutions most distinguished in providing training services both inside and outside the United Arab Emirates.

At TRENDS, we realize that the business success of an organisation depends on the effectiveness of systems and the efficiency of personnel at all levels inside such an organisation.

That is because we believe that raising the efficiency of personnel is the key to achieve the highest effectiveness and productivity and leads to increase the profitability of this organisation.

Our training services aim to enhance specific aspects of trainees, who are the most crucial means for the development and improvement of production efficiency in organizations. The best investments are those made in the human element.

TODDINGTON INTERNATIONAL INC.
Knowledge Powered by Intelligence™

TODDINGTON INTERNATIONAL INC

With a global client base ranging from government agencies to members of the Fortune 500, Toddington International Inc. ("TII") has been enabling its customers to find and use online information more effectively since 1997.

Backed by over a decade and a half of experience providing advanced Internet intelligence services to a range of law enforcement agencies, in addition to private sector clients in the financial services, petrochemical, pharmaceutical, and manufacturing industries, TII develops and delivers comprehensive, highly-acclaimed classroom-based and e-learning programs that enable frontline investigative and research professionals to find better online information, in less time, at less cost, with less risk™.

DAVID TODDINGTON
CEO, Toddington International INC.

With a background as a senior manager in the IT industry and experience in police and military operations, David and his team have been developing and delivering a wide range of advanced proactive and reactive Open Source Intelligence and investigative solutions to both the private and public sectors for the past two decades.

In working with the private sector, David maintains a position as Special Advisor to the International Chamber of Commerce Commercial Crime Section in London. He also sits as Chair of the Open Source intelligence and Research Association (OSIRA), a professional body for the OSINT industry.

Among other awards, David has been the recipient of a Royal Canadian Mounted Police Commanding Officer's Commendation for his work in the development and implementation of new police Open Source Intelligence systems.
