203C CTI
Critical Thinking for Investigators

Delivered in partnership with:

CPIO
COUNCIL OF PROFESSIONAL INVESTIGATORS ONTARIO
EST. 1969

Nov. 28-29, 2022 | Remote Delivery | 1000-1800 EST (1500-2300 UTC)

In an age of time compression and information overload of varying quality, critical thinking skills are more important than ever for the practitioner. Optimal thinking processes impact all stages of intelligence and investigation, from observation, collection and analysis, through to decisions, communication and professional effectiveness.

While we are called upon to use our critical and logical thinking skills on a daily basis, most of us have done so without a careful examination of our thinking processes (cognition) and the development of higher awareness of those processes (metacognition.)

Broadcast-quality, and remotely delivered, this course employs an engaging, teaching approach that sets up all learning styles for success. This two-day introduction to critical thinking will give practitioners a foundation in critical thinking that is immediately applicable to their work.

In this course, tools and approaches to optimize mental processes will be discussed and practitioners will come away with an enhanced understanding of how their own personality and habits of mind influence the collection and processing of information.

This sought after course will provide opportunities to engage with other practitioners in round-table discussion and employs real-world examples to reinforce core concepts.

LEARN ABOUT

- Development of critical thinking theory and concepts
- Factors that enhance and impede thought processes
- Exercises to develop metacognition and enhanced awareness
- Optimizing cognitive management during work flows
- Managing thought processes in high pressure environments
- Cultivating focus and managing distractions in thought processes
- Understanding and minimizing the impact of heuristics and cognitive bias on investigations
- Critical evaluation of internet sources
- Attention ruptures and attention residue, and identifying opportunities to mitigate these impacts on cognitive processing
- Avoiding common investigative failures and short comings
- Producing valid and sound inductive and deductive arguments to support analysis, decisions and communicate effectively
- The brain science of creative and divergent thinkers
- Uncovering ones own implicit assumptions through Harvard University's Project Implicit self-assessment
- Accessing the creative problem-solving power of unconscious cognition
- Tactical thinking tools for implementation of critical thinking
- Strategies for fostering critical thinking environments
- Techniques to mitigate the limitations of working memory and cognitive overload
- Tactical tools for implementing critical thinking at all stages of a tasking
- Placing core critical thinking strategies at each stage of an investigation
- Best practices and tips from experienced intelligence and investigative practitioners

WHO BENEFITS?

- Investigators
- Analysts
- Researchers
- Journalists
- Law Enforcement
- Government Officers
- Public Safety & Security Professionals
- Legal Practitioners
- Information Specialists
- Business Managers
- Competitive Intelligence Professionals
- Petrochemical & Pharmaceutical Reps
- Manufacturing & Marketing Professionals
- Regulatory & Compliance Professionals
- Finance Professionals
- Insurance Providers
- Fraud & AML Examiners
- Human Resource Managers
- Loss Prevention Officers
- Debt Collectors
- Non-Profit Organizations

PRICE

SPECIAL

CPIO Members: $449.99*
plus tax

Non-Members: $499.99
plus tax

Limited seats available.

Includes:

- Two-day studio-quality, live streaming, interactive training
- Multiple expert instructors
- Comprehensive collection of downloadable training materials
- Special access to select OSINT resources
- Certificate of completion
- 16 CPE Credits (**CPIO Members**) upon passing exam

3 WAYS TO REGISTER

- Register online **here**
- Email your details and training needs to **training@toddington.com**
- Call us at **604-468-9222**

TRAINING DELIVERY

This training will be delivered remotely via the **Zoom** video conference platform on: **No. 28-29, 2022 (1000-1800 EST |1500-2300 UTC)**.

TECHNICAL REQUIREMENTS

Participants will require access to the internet, as well as a computer that is capable of accessing the internet and installing/downloading basic software for the course. Participants can be provided with a list of software to be downloaded in advance of the course upon request.

ABOUT TII

We are **thought leaders** who, since 1997, have been developing and delivering internationally acclaimed training products specific to the needs of our clients, in both public and private sectors.

As experts in Open Source Intelligence (OSINT), we are a **multi-disciplinary**, international team of seasoned professionals with **extensive experience** in front-line intelligence and investigative operations.

We are committed to the principles of **knowledge**, **integrity**, and **excellence** in everything we do. We are **passionate** and **innovative educators** who deliver highly-acclaimed, **world-class training** programs that provide direct and tangible benefit to our clients across their entire organization.

From law enforcement and the intelligence community, to military and government agencies within the Five Eyes and beyond, from financial institutions and manufacturers, to petrochemical and pharmaceutical corporations within the Fortune 500, we **listen** to our clients and provide innovative **training solutions** specific to their needs.

As professional facilitators, we provide outstanding customer experiences that **inspire**, **enlighten**, and **stimulate**. We foster **creative solutions** for complex problems, while working within defined policy and legislative frameworks.

For **over two decades**, we have delivered training to **tens of thousands** of students in various formats, on every major continent. Our continued international reach exposes us to a myriad of practices, and as we impart knowledge, we also learn from our clients and use what we learn to continually innovate and improve.

We are **passionate** about educating, innovating, and helping our clients reach new levels of **success**, and most importantly, we believe in using what we know to make the world a **safer** place.

In a world where uncertainty is sometimes the only certainty, and accelerating change is the norm, we recognize that success depends not just on technical best practices and the application of best-of-breed products, superior critical thinking skills, in addition to effective logical and creative thought processes, are essential to achieve maximum benefit and avoid failure.

Utilizing proven adult learning principles, and with an approach that is always flexible, our curricula incorporates not just best practices, but key behavioural science elements essential for the success of our clients.
