Cheat Sheet: Advanced Search Techniques

Find better online information, in less time, at less cost, with less risk™

The following is a list of the most useful search techniques and/or operators, gathered from a variety of sources, that are used by researchers and investigators to get the best results out of search engines, and can be used to enhance anyone's set of search skills. Many of these search techniques are effective with the majority of search engines found in use today across the internet; some may be specific to a search engine.

BASIC SEARCHES	
money laundering	Search for results containing both the words "money" and "laundering"
money +laundering	Search for results containing both the words "money" and "laundering"
money AND laundering	Search for results containing both the words "money" and "laundering"
"money laundering"	Search for results containing the exact phrase "money laundering"
money OR laundering	Search for results containing either the word "money" or "laundering"
money laundering	Search for results containing either the word "money" or "laundering"
money -laundering	Search for results containing the word "money" but not "laundering"
money NOT laundering	Search for results containing the word "money" but not "laundering"
money-laundering	Search for results containing variations as a single word, a phrase, or hyphenated words
"money" laundering	Search for results containing the exact word "money" and word variations of "laundering," including laundering, launders, launderers, or money-launderers
"money * laundering"	Search for results containing the exact words "money" and "laundering" with up to four other words between (ex. "money was hidden by laundering," or "money by laundering")
what is, what are, how do I, or where can I	Search for results using a question format, usually for seeking answers to questions (ex. "what is money laundering," "how do I identify money laundering")
