104E WAI

Report Writing for Analysts and Investigators

E-Learning Timeframe: 20-30 Hrs | Complete Within 6 Months

Clear, well-structured intelligence writing is a core professional skill for police, intelligence analysts, and investigators. Written intelligence products are relied upon by decision-makers, operational teams, courts, and partner agencies, making clarity, accuracy, and analytical discipline essential. The **Report Writing for Analysts and Investigators** course focuses on how intelligence is written in real investigative environments, where poor communication can undermine analysis, misinform decisions, or weaken credibility under scrutiny.

While this course uses **police intelligence and law-enforcement examples**, the principles taught are **equally applicable to intelligence analysts and investigators across both public and private sectors**. The standards, structures, and techniques explored reflect professional intelligence writing practices that remain consistent regardless of role or organizational setting. Emphasis is placed on producing clear, defensible intelligence products that support investigations, inform decisions, and withstand legal and professional review.

COURSE OUTLINE

Module 1

- Purpose and role of intelligence writing in investigative environments
- Differences between intelligence, academic, and general writing
- Audience awareness and decision-maker needs
- Structure, clarity, and professional standards for intelligence communication

Module 2

- Common cognitive biases affecting intelligence analysis
- How bias influences written intelligence products
- Risks to investigations and decision-making
- Strategies to recognize, mitigate bias, and maintain objectivity

Module 3

- Sentence structure and voice in intelligence writing
- Using active voice for clarity, accountability, and precision
- Appropriate use of passive voice to reduce ambiguity

Module 4

- Importance of grammar and punctuation in intelligence writing
- Use of inclusive and unbiased language
- Writing consistency and professional credibility
- Editing, proofreading, and risks of over-reliance on spell check

Module 5

- Types and purposes of analytical reports
- Structure of briefing notes and analytical products
- Proper sourcing, citation, and documentation practices
- Caveats, protection ratings, note-taking, and information handling

Module 6

- Role of AI in intelligence analysis and writing
- Benefits and limitations, including accuracy and bias risks
- Legal, ethical considerations, and the need for human oversight
